

## SUPPLEMENTARY INFORMATION (APPENDICES)

### APPENDIX B – CHECKLIST FOR WASTE PRIOR TO BEING TRANSPORTED OFFSITE FOR BENEFICIAL RE-USE

<b>MATTERS TO CONSIDER PRIOR TO WASTE BEING TRANSPORTED OFFSITE FOR BENEFICIAL RE-USE</b>		
Issue	Y/N	Comments
Is the relevant resource recovery exemption or order still current?		
Has the waste been appropriately classified and tested (if required) to verify it meets any specific conditions for its re-use?		
Has the proposed receiver (consumer) of the waste material been made aware of the conditions for re-use, including the relevant EPA resource recovery order and exemption (if applicable)?		
Where waste is being transported to a non-licensed site, has a signed section 143 notice been received from the landholder proposing to receive the waste? This is required to confirm that the receiving site has approval to accept this material (that is, development consent is not required).		
<b>ONCE MATERIAL HAS BEEN TRANSPORTED OFFSITE</b>		
Keep all records of the quantity and nature of material supplied, the person it is supplied to, and all testing, sampling and characterisation for 6 years.		
Proof of purchase (as a minimum) will be required if the material was purchased from a quarry or landscaping business.
